

# High Blood Pressure & Type 2 Diabetes

## CAUTION!

*Diabetes increases your risk for high blood pressure.*

Physicians are studying the investigational use of two approved high blood pressure medications in people with type 2 diabetes.

You may participate if you have been diagnosed with type 2 diabetes and have, or think you may have, high blood pressure.

To qualify you must be on a stable diabetes treatment, but not taking insulin.

Qualified participants receive study-related care, including physical exams, lab services and high blood pressure medication at no cost.
